ST Teleport appointed official broadcaster for the 117th International Olympic Committee Session

ST Teleport has been appointed the Official Host Broadcaster for the 117th IOC Session in Singapore by the International Olympic Committee (IOC). From 6 to 9 July, the company will transmit 'live' video feeds of the session proceedings to broadcasters and news agencies around the globe from its Master Control Centre and Booking Centre situated at the Raffles Convention Centre.

The 117th IOC Session will be keenly watched by billions of people worldwide as cities including London, Madrid, Moscow, New York and Paris vie for a chance to host the 2012 Olympics.

As the official broadcaster, ST Teleport will play a crucial role in delivering the closely anticipated results when the chosen host city for the 2012 Olympic Games is announced 'live' to the world. >>

ST Telemedia and Indosat started reconstruction of schools in Aceh Province

Children affected by the tsunami disaster will soon be able to resume their education in permanent schools, thanks to the funds raised from the ST Telemedia Group, Indosat, their employees as well as Indosat's cellular customers. Approximately S\$1.3 million was raised by the ST Telemedia Group and Indosat which will go towards land acquisition, building construction, furniture, rental of the temporary schools and the operation of two primary schools for the first year. From 18 July, students of the two schools will start their learning at temporary locations. The new school premises are expected to be ready by November 2005. >>

Equinix ranked as one of the world's top co-location service providers by Tier 1 Research

In a report on "Internet Infrastructure Services: 2004 Year End Market Size/Share Review" by Tier 1 Research, an independent research firm covering the Information Technology and Communication sectors in the U.S., Equinix shared third position with AT&T in 2004 with 6.9% of the global co-location market share. Solid growth between 2001 and 2003 saw Equinix reap the rewards by emerging as one of the world's top co-location services providers, despite a market downturn during that period. According to the report, Equinix is expected to take the lead as a co-location services provider globally in 2006.
